MEMORANDUM

*Attached to 3/12/80
letter*

TO: Roger Blair, Director
Hazardous Material & Waste Management

FROM: Jack A. Wilson, Acting Commissioner
Bureau of Environmental Protection

DATE: March 18, 1980

SUBJECT: Attached Correspondence from Louisville Varnish Company

Attached is a letter from Clayton Simon, Louisville Varnish Company, identifying certain drums at the Valley of the Drums as having come from Louisville Varnish and requesting permission to remove those drums and process as a part of their current waste streams. Please review and draft a response on my behalf.

It is my preliminary assessment that the drums of waste solvent and waste waters should be batch sampled and analyzed. A similar procedure might need to be required for the waste solids. I also believe that we should request them to confirm their current disposal process to assure that if this material was integrated, the waste would be properly disposed. Please return a response for my approval no later than March 26.
